

## COMPANY PROFILE

Greensteam Australia has been providing Non-Chemical Weed control solutions to Perth and Western Australian clients since 2008.

We are pioneers in the provision of commercial Chemical free weed control solutions. Our entire range of services are designed, solely to cater for sustainable Non-Chemical services. We are passionate about delivering effective and environmentally friendly solutions to our customers.

We work closely with Western Australian Councils to provide tailored services in a variety of requirements.

Today we are the largest and most established fleet of Non-Chemical Weed control providers in Australia. We are committed to supporting the rapid adoption of new and innovative approaches in Natural Areas Management and Asset protection utilising eco safe practices.

Our aim is to continue to implement practical and environmentally sustainable Non-Chemical solutions through the use of innovative technology and upskilling human resources.

Our large capacity and 15 years of service expertise ensures that we are a valuable contributor in the provision of advice, consultancy, project plans and proposals and the supply of skilled labour resources for all environmental services.
